THE *DPR-SERIES* ROTARY AIR DRIVEN POWER UNITS ARE A TWO SPEED HIGH PERFORMANCE PUMP DESIGN.

They are ideally suited to applications where air is the preferred power source. A choice of valve configurations allows them to be used with single or double acting cylinders and tools. Optional valve sub-plates offer pressure and flow control. All models feature a Gast® heavy duty air motor with a slide type motor ON/OFF air supply valve and 11 L usable oil reservoir.

Did you know...

Durapac offers a range of optional sub-plates and directional control valves to suit the DPR-Series air driven power units.

- Optional air actuated directional control valves, 3 & 4 way versions available.
- Optional pilot check valve sub-plate.
- Optional adjustable pressure relief valve sub-plate.

Dump valve is a 2 way, 2 position lever operated flipper valve:

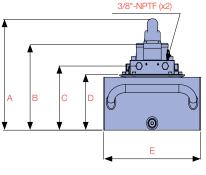

Position 1: oil goes from pump to cylinder/tool and line pressure is held when pump is stopped.

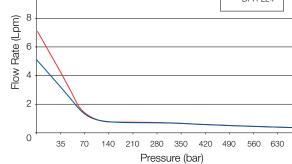

Position 2: oil goes from pump to cylinder/tool and flows back automatically when pump is stopped.

DPR-223

Manual 3 way/3 position valve for Advance/ Hold/Retract of single acting cylinder/tool. Valve handle operation can be swapped from detent to spring loaded.
