

THE **DJS-SERIES** JACK STAND IS DESIGNED TO COMPLIMENT THE DURAPAC SDL LOCKING JACKS.

The DJS-Series Jack Stand is rated and certified to 100 tonne and complies with AS/NZS 2538:2004 standard for vehicle support stands.

A pneumatic assist raises the central piston against the vehicle while the lock nut is wound down by the operator. They can be permanently joined via continuous tine pockets to produce dedicated stands for particular vehicles or applications.

Australian designed and built to meet AS/NZS 2693:2007 standard for vehicle jacks

DJS-1000

Model Number	Load Capacity			Min. Height (mm)	Max. Height (mm)	Base W x L (mm)	Air Pressure Rating (bar)	Max. Rated Height (mm)	Weight (kg)
	Metric (tonne)	US (ton)*	(kN)						
DJS-650	100	110	980	650	900	600 x 600	7	1,100	274
DJS-800	100	110	980	800	1,200	600 x 600	7	1,500	323
DJS-1000	100	110	980	1,000	1,400	600 x 600	7	1,700	370

* Nominal Cylinder Capacity in ton - see kN values for actual capacity

LOCK NUT

is wound down to the housing shoulder to hold load at any position

STAND HEIGHT ADJUSTMENT

is controlled by an internal pneumatic cylinder

EASE OF USE

fork tine pockets and shackle lifting points are provided for ease of use and manoeuvring. A standard Euro style pallet jack can also be used for transport of the stand

3 WAY / 3 POSITION CONTROL VALVE

releases air from cylinder

CASTOR WHEELS

Optional Castor Wheels and Steering Handle are available for positioning the Jack Stand

CAPACITY

**100 tonne
(110 US ton)**

MAX. RATED HEIGHT RANGE

1,100 – 1,700 mm

A

SPECIALTY LIFTING SYSTEMS

Extension storage

Standard SDL extensions, load and swivel load caps may be used. See Page 16 for SD-Accessories

DJS-1000 with optional Steering Handle and Castor Wheels
