

THE **DPP-SERIES** POLE JACK SYSTEM IS A POWERFUL, YET LIGHTWEIGHT DESIGN UNIT FOR THE ASSEMBLY OF STEEL POLES USING A SLIP JOINT DESIGN AND JACKING NUTS.

It features lightweight aluminum 20 ton hydraulic pull cylinders, high strength steel jacking frames and high tensile Grade 100 chain. The system can be used when the poles are horizontal or vertical, and each component is designed to be easily handled by one person. Durapac offers a range of suitable power pumps and accessories to suit.

DPP-20

DPP-20 STANDARD INCLUSIONS:

- 2 x Durapac RAP-206 Aluminum Hydraulic Pull Cylinders with internal spring return and fitted with male snap couplings
- 2 x High Strength Welded Steel Jacking Frames
- 2 x Grade 100 RUD® VIP Chain Assemblies with Grab Hook
- Jacking bolts and studs to suit 1" UNC jacking nuts

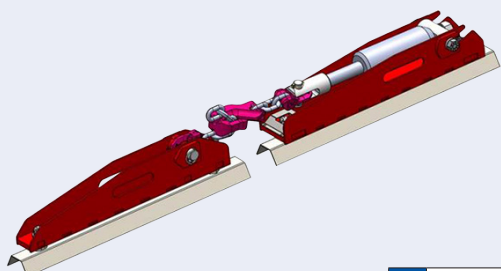

Model Number	Max. Load (lb)	Max. Stroke (In)	Pressure Rating (psi)	Chain Length (ft)	Jacking Nut Centers (In)	Max. Component Weight (lb)
DPP-20	87,000	5.90	10,150	8	30	45

i

DPP-20 can be ordered separately or as part of a kit

- Use **Kit Model No.** to order the Kit
- **Kit Options and Kit Standard Inclusions** are shown below in the table

Kit Model No.	Kit Options - Power Unit*	Kit Standard Inclusions
DPP-20B	Battery Power Unit  DBP-120M	Pole Pulling Assembly  DPP-20
DPP-20E	115V Electric Power Unit  SPES4505NCL-115V	Hydraulic Hoses  HPS-0603FF
DPP-20G	Gasoline Power Unit  PPM-2014	Gauge Manifold Transport Frame  VMN-2M-GFC-FF

*Power Unit supplied with Male Snap Couplings
